

DATA SCIENTIST (Power BI & Jupyter Notebook)

Section I: Overview			
Role Title	Data Scientist (Power BI & Jupyter)	Location	Doha, Qatar
Role Type	Contract/ Onsite	Department	Business Systems
Grade	N/A	Job Code	-

Section I: QUALIFICATIONS
- Minimum bachelor's degree in computer science, Software Engineering, or a related field (or equivalent experience). - Certification in data science, Statistics, Computer Science, or a related field (or equivalent experience) is preferred.

Section II: SKILLS
- Strong understanding of data visualization principles and best practices. - Ability to effectively translate data into visually compelling and easily digestible formats. - Excellent communication and presentation skills, with the ability to translate technical concepts into plain language. - Strong analytical and problem-solving skills. - Ability to work independently and as part of a team. - Proficiency in SQL, Python, and other programming languages for data cleaning/wrangling, scripting, and automation. - Strong expertise in Power BI for data visualization, Data cleaning (Power Query) report development, and dashboard design. - Solid understanding of data modeling concepts (dimensional modeling, star schema, snowflake schema) and database technologies (SQL Server, Oracle, MySQL, etc.).

Section III: WORK EXPERIENCE
- Minimum 8 years of experience as a Data Scientist or similar role. - Proven experience in data modeling, ETL processes, and data warehouse development. - Proven experience in building user-friendly and impactful dashboards in Power BI.

Section IV: PRIMARY DUTIES & RESPONSIBILITIES

- Design and implement data models for efficient storage, retrieval, and analysis of data.
- Develop and maintain Extract, Transform, Load (ETL) pipelines to automate data ingestion and preparation.
- Design and build data warehouses for centralized data storage and analysis.
- Utilize Python, Jupyter Notebook, and Power BI to analyze data, identify trends, and develop predictive models.
- Create visually appealing and informative reports and dashboards that communicate insights effectively to business users.
- Collaborate with business stakeholders to understand their data needs and translate them into actionable insights.
- Stay up to date with the latest data science trends and technologies.
- Design and develop user-friendly and visually appealing dashboards in Power BI:
- Utilize best practices for dashboard design, including clear hierarchy, consistent formatting, and intuitive navigation.
- Select appropriate and impactful visualizations based on data types and user needs.
- Incorporate interactivity features like slicers, filters, and drill-throughs for user exploration.
- Ensure dashboards are optimized for various devices (desktop, mobile).
- Partner with business stakeholders to understand their dashboard requirements:
- Conduct requirements gathering sessions and actively listen to user feedback.
- Translate complex data into clear and actionable insights aligned with business objectives.
