SUMMARY

Data science Engineer with 8 years of experience in solving complex business tasks using data science and analytical approach, machine learning, and ML operations to solve real-world business problems. Specialized in ML-AI, MLOps, Power App, Power Automate, AI Builder, Gen AI & Agentic AI, enhancing operational efficiency. Proven in automating workflows, improving decision-making and generating measurable business value using data science and applied AI/ML techniques.

KEY SKILLS

Language: Python, SQL

Framework: LangChain, CrewAI, HuggingFace Transformers, Chroma, FAISS

Data Technologies: Databricks, ML Ops, Azure Data Pipeline

Data Visualization: Power Bi, QlikSense, Plotly

Automation Tools: Power Apps, Power Automate, AI Builder.

Cloud: Azure

PROFESSIONAL EXPERIENCE

Shell India Markets Pvt. Ltd. | Bengaluru, India

Apr '20 - Present

Data Scientist

- Led an **NLP-based vendor names standardization** project across 2.1 million records using TF-IDF+Bert embeddings and clustering algorithms, improving data consistency and enabling accurate vendor matching with 91% accuracy
- **Championed the AI chat** agent for BI & Root Cause Analysis through the transformation of natural language into **SQL using OpenAI & Flask**, seamlessly integrated with Microsoft Teams
- **Designed & implemented** a end to end multi-agent automation system utilizing Powerapps, Power autoamte and LangChain to analyze operational risk categories, automate root cause analysis, cluster past learnings, & offer recommendations, enhancing **efficiency by 10%**
- **Developed** an AI-based summarization tool for Risk Compliance, boosting efficiency by 12%.
- **Delivered business-critical** predictive models leading to 5% gain in working capital efficiency
- **Integrated Databricks** with **PowerApps** and **Power BI** for real-time data processing and analytics
- **Generated \$3 million** in indirect business value by resolving stock and terminal outages using **power bi and power apps**
- **Created an** internal document query chatbot using Power Apps & LLMs for knowledge retrieval.
- Leveraged **Microsfot Azure & Azure Databricks** for cloud-based ML model deployment and **MLOps** for streamlined ML operations

Petrolink Data Services Pvt Ltd. | Kochi, India

Apr '17 - Mar '20

Project Engineer

Engineering and Data Science

- **Engineered** a real-time drilling solutions for monitoring flow-back volume and identifying abnormal events, reducing downtime by 5% and operational costs by 10%
- **Employed** Random Forest algorithm to create rig state classifier systems, reducing identification lag time.

- **Applied ML** to detect washout stuck pipe events, increasing response speed and reducing NPT
- **Created** root cause analysis reports library, reducing operational downtime by 5%

EDUCATION

IIIT-Bangalore Bengaluru, India	Sep '18 - Sep '19
<i>Master in Data Science</i>	
Andhra University Visakhapatnam, India	Aug '13 - Aug '15
<i>Master Of Technology in Petroleum Technologies</i>	
UPES Dehradun, India	Aug '08 - Jul '12
<i>Bachelor of Technology in Geo-Informatics</i>
